# *SPARK PLUG CATALOG*

Automotive

NGK Spark Plugs leads the industry in spark plug technology, developing OE and aftermarket solutions for domestic and import vehicles of today and tomorrow.

THE IGNITION SPECIALIST™

### Original Equipment Spark Plugs

- Laser Iridium
- Laser Platinum
- V-Power
- Nickel

Original equipment for many auto, marine, powersports and power equipment applications.

### RUTHENIUM HX™

Offers the highest performance and life expectancy of any Aftermarket spark plug line due to the metal composition and specialized tip design.

### NGK IRIDIUM IX®

Better performance upgrade for all vehicles. Extreme ignitability, throttle response and anti-fouling properties.

### G-POWER®

Affordable replacement over original equipment plugs. Ideal for all vehicles

THE IGNITION SPECIALIST™

# REASONS TO REPLACE PLUGS

**#1** *Optimal performance*

 *Quicker starts*

 *Reduces fouling*

 *Better fuel efficiency*

 *Less down time*

 **MORE DRIVE TIME**

# RUTHENIUM<sup>TM</sup> HX

High Ignitability Spark Plugs

## Patented OEM Ruthenium Technology

Provides greater durability than traditional Iridium/  
Platinum spark plugs in high heat engines

## Enhanced blistering/ anti-peeling

Prevents physical wear-out and the peeling  
of microparticles on the center electrode

## Superior oxidation resistance

Prevents chemical breakdown  
of the center electrode

## Advanced high- ignitability technology

Provides the most  
complete fuel  
burn

## How does NGK RUTHENIUM HX<sup>TM</sup> compare to other spark plugs?

NGK's patented Ruthenium technology allows for faster and greater flame growth, resulting in 50% more complete fuel combustion vs. nickel spark plugs. NGK RUTHENIUM HX<sup>TM</sup> provides twice the service life of NGK IRIDIUM IX<sup>®</sup>.

Patented specialized OEM designs to meet the demands of modern engines.

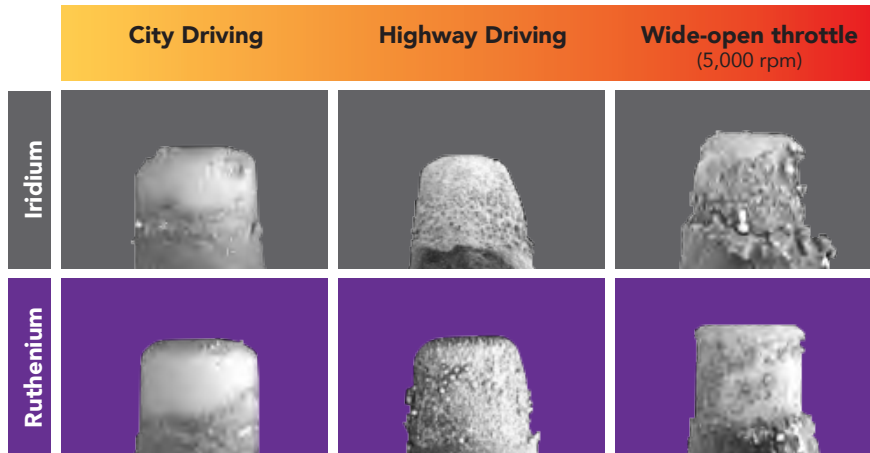

**Double Fine Electrode  
(DFE) design**

**Projected Square Platinum  
Electrode PSPE<sup>®</sup> design**

## DURABILITY

NGK's patented Ruthenium technology is available in our most advanced OEM designs to provide the most optimal durability at high temperatures in various driving conditions.

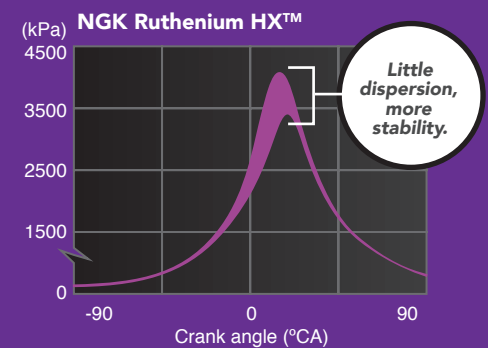

## TESTING & MANUFACTURING

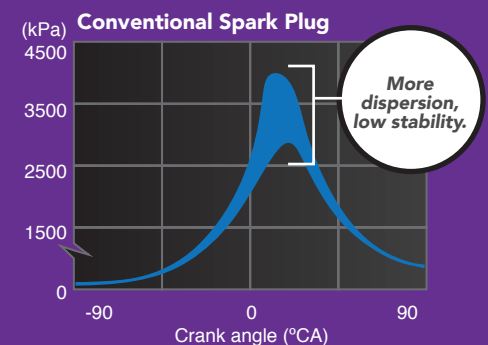

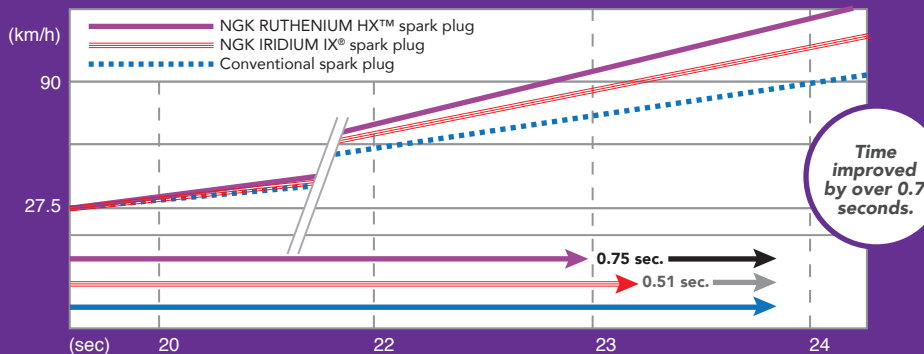

All NGK spark plugs must pass extensive testing procedures and quality checks to ensure fit and performance.

- Combustion pressure testing to maintain stable performance (Diagram 1)
- Acceleration testing for improved acceleration performance (Diagram 2)
- Mechanical vibration testing
- Thermal shock testing to -40°F
- Tightest resistor manufacturing process in the industry
- Manufacturing in our ISO 11565 certified manufacturing facility
- Gap measurement with laser precision throughout production process
- Center electrodes are accurately positioned with 360° welding process

### COMBUSTION PRESSURE TEST *Diagram 1*

### ACCELERATION TEST *Diagram 2*

# The NGK Difference

**High-grade alumina silicate ceramic** - Creates a stronger insulator to reduce dielectric punch-through (caused by spark exiting through side of ceramic).

**Corrugated ribs** - Prevents "flashover" of spark, which can lead to harmful misfires and rob you of performance.

**Triple gasket sealing process** - virtually eliminates the possibility of combustion gas leakage back through the shell.

**98% pure copper core** - Increased heat dissipation for reliable starts, prevents spark plug overheating.

**Custom designed ground and center electrodes**

**Longer insulator nose** - this superior design, sometimes called a "power tip". Prevents loading up or fouling, even after prolonged periods of idling, or at slow speeds.

**Cold-rolled threads** - Prevents cross-threading and damage to cylinder heads.

**Trivalent metal plating** - No anti-seize required.

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

93

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

110 **Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

El texto marcado en negrita indica que NGK es el proveedor para Equipo Original y/o Repuesto de Equipo Original.  
El texto sin negritas marca que es un equivalente al Equipo Original.

Nota: Debido a las diferentes condiciones de operación del motor, se puede requerir un rango térmico alterno.

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

130 **Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

El texto marcado en negrita indica que NGK es el proveedor para  
Equipo Original y/o Repuesto de Equipo Original.  
El texto sin negritas marca que es un equivalente al Equipo Original.

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Nota: Debido a las diferentes condiciones de operación del motor, se puede requerir un rango térmico alterno.

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

210 Bold denotes NGK OE Manufacturer and/or OE Service Part  
NOT BOLD denotes OE Equivalent Part

El texto marcado en negrita indica que NGK es el proveedor para Equipo Original y/o Repuesto de Equipo Original.  
El texto sin negritas marca que es un equivalente al Equipo Original.

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Nota: Debido a las diferentes condiciones de operación del motor, se puede requerir un rango térmico alterno.

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
 NOT BOLD denotes OE Equivalent Part

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
 Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**Bold denotes NGK OE Manufacturer and/or OE Service Part**  
NOT BOLD denotes OE Equivalent Part

**Le texte en gras désigne une pièce d'équipement originale du manufacturier NGK et/ou pièce d'équipement originale de service**  
Le texte non en gras désigne une pièce d'équipement originale équivalente

Note: Due to different operating or engine conditions, alternate heat range plugs may be required.

Note: En raison de différences au niveau du fonctionnement ou des conditions du moteur, d'autres types de bougies avec variation de chaleur peuvent être nécessaires

**NOTE:** Cross references are provided as a GUIDE ONLY. Due to differences in design / materials, products produced by various mfrs may have different specifications. Please refer to specific application guide for proper usage.

**REMARQUE:** Les références sont fournies en GUIDE UNIQUEMENT. En raison des différences de conception et de matériaux, des produits fabriqués par différents fabricants peuvent avoir des spécifications différentes. Veuillez vous référer au guide d'application spécifique pour l'utilisation correcte.

**NOTE:** Cross references are provided as a GUIDE ONLY. Due to differences in design / materials, products produced by various mfrs may have different specifications. Please refer to specific application guide for proper usage.

**REMARQUE:** Les références sont fournies en GUIDE UNIQUEMENT. En raison des différences de conception et de matériaux, des produits fabriqués par différents fabricants peuvent avoir des spécifications différentes. Veuillez vous référer au guide d'application spécifique pour l'utilisation correcte.

### INTRODUCTION

Spark plugs are one of the most misunderstood components of an engine.

This guide was designed to assist the technician, hobbyist, or race mechanic in understanding, installing, and troubleshooting spark plugs. The information contained in this guide applies to all types of internal combustion engines. Two stroke engines, rotary engines, high performance/ racing engines and street vehicles.

Spark plugs are the window into your engine (your only eyewitness to the combustion chamber), and hence can be used as a valuable diagnostic tool. Like a patient's thermometer, the spark plug displays symptoms and conditions of the engine's performance. The experienced tuner will analyze these symptoms to track down the root cause of any problems or to determine air/fuel ratios.

### BASICS:

The spark plug has two primary functions:

- 1) To ignite the air/fuel mixture
- 2) Remove heat away from the spark plug tip

Spark plugs transmit electrical energy that turn fuel into working energy. A sufficient amount of voltage must be supplied by the ignition system to cause it to spark across the spark plug's gap. This is called electrical performance.

Additionally, the temperature of the spark plug's firing end must be kept low enough to prevent pre-ignition, but high enough to prevent fouling. This is called thermal performance and is determined by the heat range selected.

It is crucial to remember that spark plugs **CANNOT create heat**, they can only **remove** heat. The spark plug works as a **heat-exchanger** by pulling unwanted thermal energy away from the combustion chamber and transferring the heat to the engine's cooling system. The heat range is defined as a plug's ability to dissipate heat. The rate of heat transfer is determined by:

- 1) The insulator nose length
- 2) Gas volume around the insulator nose
- 3) Materials / construction of center electrode and ceramic insulator

A spark plug's heat range has no relationship to the actual voltage transferred through the spark plug. Rather, the heat range is a measure of the spark plug's ability to remove heat from the combustion chamber. The heat range measurement is determined by several factors; the length of the ceramic center insulator nose and its ability to absorb and transfer combustion heat, the material composition of the insulator and center electrode material.

**HEAT RATING AND HEAT FLOW PATH OF SPARK PLUGS**

**HOT TYPE**  
It has a larger surface exposed to the combustion gasses. It dissipates heat slowly. Its firing end heats up quickly.

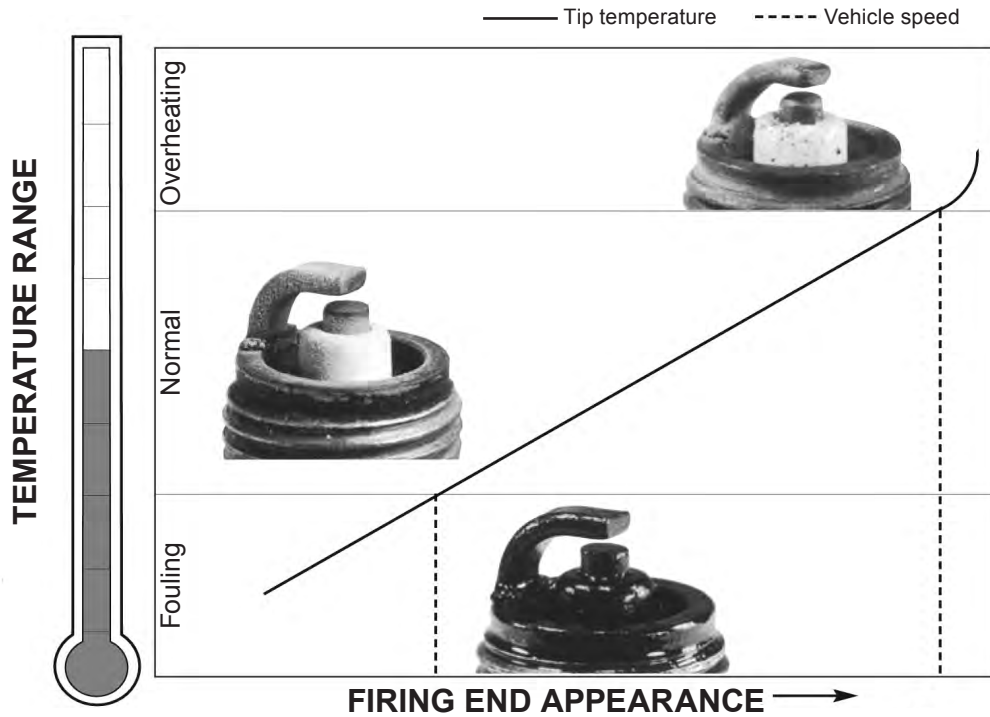

**COLD TYPE**  
It has a smaller surface exposed to the combustion gasses. It dissipates heat quickly. Its firing end does not heat up quickly.

The insulator nose length is the distance from the firing tip of the insulator to the point where the insulator meets the metal shell. Since the insulator tip is the hottest part of the spark plug, the tip temperature is a primary factor in pre-ignition and fouling. Whether the spark plugs are fitted in a lawnmower, boat, or a race car, the spark plug tip temperature must remain between 450°C-850°C. If the tip temperature is lower than 450°C, the insulator area surrounding the center electrode will not be hot enough to burn off carbon and combustion chamber deposits. Accumulated deposits can result in spark plug fouling leading to misfire.

If the tip temperature is higher than 850°C the spark plug will overheat which may cause the ceramic around the center electrode to blister and the electrodes to melt. This may lead to pre-ignition/detonation and expensive engine damage. In identical spark plug types, the difference from one heat range to the next is the ability to remove approximately 70°C to 100°C from the combustion chamber. A projected style spark plug firing temperature is increased by 10°C to 20°C.

## Spark Plug Heat Range

### SPARK PLUG TIP TEMPERATURE AND FIRING END APPEARANCE

The firing end appearance also depends on the spark plug tip temperature. There are three basic diagnostic criteria for spark plugs: good, fouled and overheated. The borderline between the fouling and optimum operating regions (450°C) is the spark plug self-cleaning temperature. The temperature at this point is where the accumulated carbon and combustion deposits are burned off.

Bearing in mind that the insulator nose length is a determining factor in the heat range of a spark plug, the longer the insulator nose, the less heat is absorbed, and the further the heat must travel into the cylinder head water journals. This means the plug has a higher internal temperature, and is said to be a hot plug. A hot spark plug maintains a higher internal operating temperature to burn off oil and carbon deposits, and has no relationship to spark quality or intensity.

Conversely, a cold spark plug has a shorter insulator nose and absorbs more combustion chamber heat. This heat travels a shorter distance, and allows the plug to operate at a lower internal temperature. A colder heat range can be necessary when the engine is modified for performance, subjected to heavy loads, or is run at high rpms for a significant period of time. The colder type removes heat more quickly, and will reduce the chance of pre-ignition/detonation and burn-out of the firing end. (Engine temperature can affect the spark plug's operating temperature, but not the spark plug's heat range).

Below is a list of some of the possible external influences on a spark plug's operating temperatures. The following symptoms or conditions may have an effect on the actual temperature of the spark plug. The spark plug cannot create these conditions, but it must be able to cope with the levels of heat, if not, the performance will suffer and engine damage can occur.

**Air/Fuel Mixtures** seriously affect engine performance and spark plug operating temperatures.

- Rich air/fuel mixtures cause tip temperature to drop, causing fouling and poor driveability.
- Lean air/fuel mixtures cause plug tip and cylinder temperature to increase resulting in pre-ignition, detonation, and possibly serious spark plug and engine damage.
- It is important to read spark plugs many times during the tuning process to achieve optimum air/fuel mixture.

**Higher Compression Ratios/Forced Induction** will elevate spark plug tip and in-cylinder temperatures

- Compression can be increased by performing any one of the following modifications:
  - a) reducing combustion chamber volume (domed pistons, smaller chamber heads, milling heads, etc.)
  - b) adding forced induction (Nitrous, Turbocharging or Supercharging)
  - c) camshaft change
- As compression increases, a colder heat range plug, higher fuel octane, and careful attention to ignition timing and air/fuel ratios are necessary. Failure to select a colder spark plug can lead to spark plug/engine damage.

**Advancing Ignition Timing**

- Advancing ignition timing by 10° causes plug tip temperature to increase by approximately 70°-100° C.

**Engine Speed and Load**

- Increases in firing-end temperature are proportional to engine speed and load. When traveling at a consistent high rate of speed, or carrying/pushing very heavy loads, a colder heat range spark plug should be installed.

**Ambient Air Temperature**

- As air temperature falls, air density/air volume becomes greater, resulting in leaner air/fuel mixtures.
- This creates higher cylinder pressures/temperatures and causes an increase in the spark plug's tip temperature. So, fuel delivery should be increased.
- As temperature increases, air density decreases, as does intake volume, and fuel delivery should be decreased.

**Humidity**

- As humidity increases, air intake volume decreases.
- Result is lower combustion pressures and temperatures, causing a decrease in the spark plug's temperature and a reduction in available power.
- Air/fuel mixture should be leaner, depending upon ambient temperature.

**Barometric Pressure/Altitude**

- Affects the spark plug's tip temperature.
- The higher the altitude, the lower cylinder pressure becomes. As the cylinder temperature decreases, so does the plug tip temperature.
- Rather than tuning by changing spark plug heat ranges, adjust jetting or air/fuel mixtures to put air back into an engine.

### TYPES OF ABNORMAL COMBUSTION

#### Pre-ignition

- Defined as: ignition of the air/fuel mixture before the pre-set ignition timing mark.
- Caused by hot spots in the combustion chamber...can be caused (or amplified) by over advanced timing, too hot a spark plug, low octane fuel, lean air/fuel mixture, too high compression, or insufficient engine cooling.
- A change to a higher octane fuel, a colder plug, richer fuel mixture, or lower compression may be in order
- You may also need to retard ignition timing, and check vehicle's cooling system.
- Pre-ignition usually leads to detonation; pre-ignition and detonation are two separate events.

#### Detonation

- The spark plug's worst enemy (besides fouling).
- Can break insulators or break off ground electrodes.
- Pre-ignition most often leads to detonation.
- Plug tip temperatures can spike to over 1648°C (3000°F) during the combustion process (in a race motor).
- Most frequently caused by hot spots in the combustion chamber. Hot spots will allow the air/fuel mixture to pre-ignite. As the piston is being forced upward by mechanical action of the connecting rod, the pre-ignited explosion will try to force piston downward. If piston can't go up (because of the force of the premature explosion) and it can't go down (because of the upward motion of the connecting rod), the piston will rattle from side to side. The resulting shock wave causes an audible pinging sound. This is detonation.
- Most of the damage that an engine sustains when "detonating" is from excessive heat.
- The spark plug is damaged by both the elevated temperatures and the accompanying shock wave, or concussion.

#### Misfires

- A spark plug is said to have misfired when enough voltage has not been delivered to light off all fuel present in the combustion chamber at the proper moment of the power stroke (a few degrees before top dead center).
- A spark plug can deliver a weak spark (or no spark at all) for a variety of reasons a: defective coil, too much compression with incorrect plug gap, dry fouled or wet fouled spark plugs, insufficient ignition timing, etc.
- Slight misfires cause a loss of performance for obvious reasons if fuel is not lit, no energy is being created.
- Severe misfires will cause poor fuel economy, poor driveability, and can lead to engine damage.

#### Fouling

- Will occur when spark plug tip temperature is insufficient to burn off carbon, fuel, oil or other deposits.
- Will cause spark to leach to metal shell: no spark across plug gap will cause a misfire.
- Wet-fouled spark plugs must be changed as spark plugs will not fire.
- Dry-fouled spark plugs can sometimes be cleaned by bringing engine up to operating temperature.
- Before changing fouled spark plugs, be sure to eliminate root cause of fouling.

## Gap

- Check gap on every plug prior to installation.
- Always use factory recommendations for gap size, unless engine is modified.
- When checking gap, use only wire gauges; flat feeler or dial gauges do not accurately measure true width of spark-gap.
- When increasing gap size for high-performance ignition systems (MSD box, etc.) never go plus/minus more than .008" in order to retain parallel surfaces between ground and center electrode.
- When gapping, never use the center electrode as a fulcrum/leverage point...cracked center electrodes can result.
- Higher compression or boosted engines require smaller gaps and high powered ignition systems.

## Spark Plug Torque

- Torque is the most critical part of installation, as it directly influences spark plug temperatures.
- A spark plug can only transfer heat effectively when it is fully seated on the cylinder head. Under-torqued spark plugs can allow combustion gas leakage, or will not allow the plug to remove heat effectively causing spark plug and cylinder temperatures rise dramatically, eventually leading to detonation, plug/engine damage.
- Over-torquing can cause distortion /warping of spark plug's internal seals, causing poor heat transfer or plug temperature increase. This eventually leads to detonation, plug/engine damage.
- Before installation, clean threads to prevent encountering resistance from carbon build-up.
- When re-installing spark plugs, spark plug threads should be clean and particle-free to ensure proper seating.
- Iron and aluminum heads have different torque specs.

TORQUE SPECIFICATIONS*					
	THREAD SIZE	CAST IRON HEADS		ALUMINUM HEADS	
		WITH TORQUE WRENCH	WITHOUT TORQUE WRENCH	WITH TORQUE WRENCH	WITHOUT TORQUE WRENCH
FLAT SEAT W/ GASKET	18 mm	3.5 kg-m ~ 4.5 kg-m 25.3 lb-ft ~ 32.5 lb-ft	1/2- 2/3 turn 180° - 240°	3.5 kg-m ~ 4.0 kg-m 25.3 lb-ft ~ 28.9 lb-ft	1/2- 2/3 turn 180° - 240°

\* Use of anti-seize is not recommended on NGK spark plugs.

All engine manufacturers have recommended torque specifications for spark plug installation, and most are represented in the chart above. Install the spark plug finger tight until the gasket or tapered seat contacts the cylinder head. Then give it the recommended turn or angle.

NGK Spark Plugs warrants that the products, which it sells to the Distributor, seller, reseller, or customer, shall be free from defects in workmanship or materials. Except in the case of damage or defect attributable to NGK Spark Plugs, the Distributor, seller, reseller, or customer shall have no claim against NGK Spark Plugs for any damaged or defective product or part. In the event that any products or parts shall prove to be defective in workmanship or materials within a period of sixty (60) days from the delivery thereof to the Distributor, seller, reseller, or customer, NGK Spark Plugs shall repair or replace the same without cost to the Distributor, seller, reseller or customer. Except as herein stated, NGK Spark Plugs shall not be liable for any damages or for the breach of any warranty, express or implied, or for any other obligation or liability on account of the products which it may sell to the Distributor, reseller, seller or customer.

(a) If during the term of this Contract the Distributor shall have reason to believe it has any claim against NGK Spark Plugs in respect of any transaction growing out of this Contract, the Distributor shall notify NGK Spark Plugs in writing within sixty (60) days after it knows or has reason to know the basis of any such claim.

(b) Failure to give the notice prescribed by Subsection (a) of this section shall relieve NGK Spark Plugs from all liability on any claim in respect to any transaction arising out of this Contract.

(c) The provisions of this section shall survive the termination of any other portions of this Contract.

THE IGNITION SPECIALIST

NGK's OE legacy, unsurpassed quality and leading vehicles in operation coverage reinforces NGK as The Ignition Specialist™. NGK's premium ignition products are manufactured to the highest durability and operational performance to meet OE standards. Each individual product line covers **over 95%** of domestic and import vehicles in operation.

**Product types include:**

- Spark Plugs
- Glow Plugs
- Ignition Coils
- Wire Sets
- Coil-on-plug-boots

THE SENSOR SPECIALIST

NTK's expansion from oxygen sensor to technical sensors is part of our ongoing commitment to streamline product types and increase coverage under one premium brand.

The only OE manufacturer with a full-line of technical sensors in the aftermarket, NTK technical sensors **offers over 85 product types with over 6,800 skus**. On average, shops perform nearly 30 technical sensor replacements every month.

**Sensor types include:**

- Position
- Pressure
- Speed
- Temperature
- Specialty
- Fluid Levels
- Emissions

The addition of a full-line brand portfolio for aftermarket vehicle electronics introduces over 22,000 skus, 215 product types for connectors, emissions, ignition, relays, solenoids and switch categories. Part of WVE's ongoing commitment is to streamline product types and increase coverage under one brand, without adding unnecessary design costs.

**Vehicle electronics types include:**

- Switches
- Emissions
- Relays
- Ignition
- Solenoids
- Connectors

Geared toward the modern technician, NGK Spark Plugs (U.S.A.), Inc.'s Technical Training combines the instruction of hands-on industry techniques and OEM expertise in a contemporary, lecture-style atmosphere. Focused on further defining diagnostic skills relating to emissions components, our training enables technicians to adapt to transitional industry trends.
