NGK/NTK Training PROGRAMS

Product & Service Focused

Designed to educate automotive professionals on three sides of the business:

Parts Channel

Parts Professionals and Field Sales Managers

Service Channel

Shop Owners, Technicians, and Service Advisors

Tech School Channel

Automotive Students and Instructors

Available in-person or through live webinars.

Technical Service Training Topics

Learn to streamline the diagnostic process and to effectively communicate the diagnosis with the application of real-world data and case studies.

Webinars: 1 hour | Classroom: 2.5–3 hours

Modern Ignition Technology

An overview of the latest in spark plug technology in today's ignition systems.

Ignition Coil-on-Plug Diagnostics

An overview of coil-on-plug operation and diagnostics on domestic and import applications.

Modern Sensor Technology

An overview of various sensor technologies and examining DTCs and their criteria.

Domestic Driveability Diagnostics & Tips

A focus on the domestic vehicle system's drivability and diagnostic steps, and a walk-through of the scan tool data's PIDs.

Import Driveability Diagnostics & Tips

A focus on the import vehicle system's drivability and diagnostic steps, and a walk-through of the scan tool data's PIDs.

Technical Product & Sales Training Topics

Build confidence, learn technology updates, and gain key talking points on NGK and NTK's various product lines.

Webinars: 1 hour | Classroom: 1–2 hours

NGK Spark Plugs Overview & Tips

A focus on spark plug technology types, high ignitability, and tips to make the right choice.

NGK Ignition Coil Overview & Tips

A focus on coil-on-plug technology types and the advantage of NGK's ignition coils.

NTK Sensors Overview & Tips

A focus on NTK technical sensors' role, coverage, and locations.

NTK VVT Solenoids Overview & Tips

A focus on the solenoid's role, coverage, and locations.

All parts and service professionals are welcome!

Contact your NGK Sales Specialist if you'd like to set up an in-person class or webinar.
